

Information on paragraph 1 and 2 of decision Ex.I/4

Hereupon, please find information requested by paragraph 1 and 2 of decision Ex.I/4 as bellow.

Table 1. Alternatives currently available and under development with possible date of registration request by paragraph 1 and 2 of decision Ex.1/4

Party: Japan				
Use category (include info. On whether post or pre-harvest)	Alternatives available	Possible date of registration	Alternatives under development	Possible date of registration
Chestnut			Methyl iodide	Unknown
Cucumber	None			
Ginger (field & protected)	Chloropicrin	Registered	Methyl iodide	Unknown
	Dazomet	Registered	Amisulbrom	Unknown
	Metham sodium	Registered	Phosphorus acid	Unknown
	1,3-Dichloropropene + Chloropicrin	Registered	Azoxystrobin + Metalaxyl- M	Unknown
	1,3-Dichloropropene + Methyl isothiocyanate	Registered		
	Metalaxyl	Registered		
	Propamocarb	Registered		
Cyazofamid	Registered			
Green & hot pepper	None			
Melon	1,3-Dichloropropene + Chloropicrin	Registered	Methyl iodide	Unknown
			Lentemin (extract from mushroom)	Unknown
Watermelon			Lentemin (extract from mushroom)	Unknown

2. Description of the methodology used to determine economic feasibility in the event that economic feasibility is used as a criterion to justify the requirement for the critical use of methyl bromide (paragraph 6 of decision Ex.I/4).
